

CAUTION:

Pacifiers mask feeding cues,
and may cause nipple confusion.
NOT for use in full-term babies.
Educate families who bring pacifiers.

CAUTION

**Bottle-Feeding may cause:
“flow preference”, biting, and over-feeding.**

**For breastfeeding babies:
try a cup, spoon or syringe first.**

**For exclusive formula-feeders,
teach the caregiver paced feeding.**

AIM should be offered only for:

Clinical indications

Mothers' who requested AIM (despite counseling and support)
